Helping Your Business Make The Switch To Renewable Energy

About Us

As a one-stop shop, we take the hassle out of finding competitive, tailored packages that meet your business needs - saving you time, money, and effort while keeping you firmly in control.

Our mission is simple: to make managing business expenses straightforward and stress-free. At Reduce My Costs, our values form the foundation of everything we do, setting us apart as a customer-focused, ethically-driven company.

We are committed to providing every customer with exceptional service, ensuring hassle-free management of your business expenditure while delivering real value.

Our team of industry experts are here to offer tailored advice, helping you secure the most competitive packages for your needs. Your dedicated Account Manager will be your primary point of contact, providing ongoing support and regular check-ins to ensure everything runs smoothly.

Whether you're upgrading an existing contract or adding services to your package, your Account Manager is always available to assist, ensuring you receive the top-quality service we promise.

Why Choose Us?

For many SMEs, renewable energy can seem out of reach—often due to high upfront costs and complex processes. At RMC, we're here to change that.

We make it easy for businesses like yours to tap into the financial and environmental benefits of renewables—without the hassle. Every journey begins with a free, tailored proposal that outlines how much your business could save. Our recommendations are based on your site, your usage, and your goals—no one-size-fits-all solutions.

With flexible funding options, including zero upfront cost packages, you can start reaping the benefits right away—without affecting your cash flow.

At RMC, we simplify renewable energy, making it cost-effective, hassle-free, and built around what matters most to your business.

- **Zero Upfront Cost Options**
- **100% Renewable Solutions**
- **Long-Term Savings**
- **Ongoing Support**

Our Renewable Solutions

Solar PV

We can help you reduce your carbon footprint by using Solar PV. Solar is a great way to reduce grid usage, costs and help the environment!

EV Charging Points

With the use of electric cars on the rise, many business now need to start thinking about installing electric vehicle charging points. We offer an end-to-end solution fully-funded or self-funded for EV.

Carbon Net-Zero Pathways

The more we work together the better understanding we gain of your processes, business needs, and requirements, allowing us to build a bigger picture of how we can assist you on the road to net-zero as outlined by the UK Government.

ESOS, SECR & Exemptions

Are you sure that you're complying with all regulations? Do you qualify for ESOS or SECR? We will work efficiently to ensure you do not receive any penalties or charges for missing completion deadlines.

LED Lighting

LED Lighting has many benefits, such as a longer lifespan, higher energy efficiency, improved environmental performance and low voltage operation.

Energy Monitoring & IoT

With the increasing charges related to utility supply, you should know what you are using and when. We offer solutions to easily monitor and track the processes and day-to-day running costs of gas and electric for your organisation.

Energy Consultancy Agreement

An Energy Consultancy Agreement allows us to tailor our service to your unique needs, so we can establish the scope of services, project goals, confidentiality, and other crucial aspects.

Our Other Energy Services

Energy Management

Every client is assigned a dedicated Account Manager who takes the time to fully understand your business's energy needs, challenges, and any existing issues. Acting as your representative, they'll liaise directly with suppliers—leveraging their industry expertise to resolve problems and secure the best outcomes, giving you complete peace of mind.

Our customer care team provides ongoing support by thoroughly checking and analysing your energy bills to ensure accuracy and prevent overcharging. They also keep a close eye on the market for new cost-saving opportunities and track your usage in real time using consumption data from your energy meters—ensuring you stay informed.

Energy Procurement

Navigating the renewable energy market can feel overwhelming—but it doesn't have to be. At Reduce My Costs, we eliminate the complexity by comparing tariffs, negotiating with suppliers on your behalf, and securing contracts tailored to your budget, energy needs, and sustainability goals.

Our team of experienced energy experts is with you every step of the way, providing trusted guidance and hands-on support throughout the entire procurement process.

Energy Strategy

An effective renewable energy strategy aligns your business goals with cost savings, carbon reduction, and long-term sustainability. But with evolving technologies, fluctuating markets, and complex regulations, building and implementing that strategy can be a real challenge.

At Reduce My Costs, our dedicated energy consultants work closely with businesses of all sizes to develop tailored renewable energy strategies - helping you cut costs, reduce your carbon footprint, and future-proof your operations.

hello@reducemycosts.co.uk

Solar PV With No Upfront Costs

Solar PV is a great way to self-generate electricity while reducing grid usage, costs and helping the environment!

The benefits of a Solar PV installation are vast; it is a 100% renewable green supply, saves on finances, requires no planning permission (apart from some size installations in Scotland), and is now efficient all year round, as well as many other benefits to the installation.

You will have access to bespoke designs, tailored to your specific site and usage. The proposal you receive will include the cost of the system (if you choose to self-fund), a visual representation of the system on your site, and a detailed analysis of the return on investment.

- 100% Renewable Source
- No Upfront Costs
- Reduce Grid Reliance
- Profit From Export Tariffs

Solar Operations and Maintenance (O&M)

By keeping your solar panels well-maintained, you can increase system performance and longevity. We can arrange, and manage O&M Contracts for your installation, as frequently as needed.

Solar Export Tariffs

Surplus energy can be exported back to the national grid - allowing you to earn revenue through an Export Tariff. We can facilitate this process for you, negotiating competitive export tariffs directly with suppliers to ensure you maximise the financial benefits of your solar investment.

Solar Battery Storage

Solar battery storage lets businesses store surplus energy, cut peak-time costs, and reduce grid reliance. Our tailored solutions, with integrated Energy Management Systems (EMS), optimise usage and boost energy independence.

hello@reducemycosts.co.uk

Lower Bills With LED Lighting

Upgrading to LED lighting is a simple yet powerful way to reduce energy consumption and save on bills. With a significantly longer lifespan and greater energy efficiency than traditional lighting, LEDs help lower emissions while cutting operational costs.

LEDs also support wider sustainability goals. They operate on low voltage, improve overall environmental performance, and reduce the need for more frequent replacements - making them a cost-effective and eco-conscious choice.

- Longer Bulb Lifespan
- Instant Energy Savings
- Lower Carbon Emissions
- Visual Comfort Lighting

Smart Controls

Automated LED controls adjust lighting based on occupancy, daylight, and schedules - cutting energy waste and boosting efficiency. We facilitate the installation of intelligent systems tailored to your site for smoother, smarter operation.

Monitoring & Reporting

With IoT integration, LEDs deliver real-time data, automated reporting, and performance insights. Our solutions support sustainability tracking and help progress toward net zero goals.

Retrofit & Upgrade Projects

LED upgrades are one of the quickest ways to reduce energy use. We handle complete retrofit projects, replacing outdated fittings with efficient LEDs, for minimal disruption and lasting savings.

hello@reducemycosts.co.uk

Drive Change With EV Charging

Did you know that the UK government aims to end the sale of new petrol and diesel vehicles by 2035? The demand for electric vehicle (EV) infrastructure in businesses is growing rapidly.

Our fully financed, end-to-end EV charging solution makes it easy and affordable to make the switch. From consultation and installation to ongoing support, we deliver tailored packages that help you future-proof your business operations and achieve your sustainability targets, while attracting eco-conscious consumers.

From single-site installations to multi-location rollouts, we'll work closely with you to design a charging solution that fits your needs, usage patterns, and budget. Our team ensures that chargers are installed efficiently, compliant with current regulations, and ready for future expansion.

- Funding Options
- Future Proof Your Business
- Keep Up With Demand
- Attract Eco-Conscious Consumers

hello@reducemycosts.co.uk

Monitoring & IoT Made Simple

We use cutting-edge IoT (Internet of Things) technology to help you cut energy consumption and boost efficiency. By integrating smart sensors, meters, and connected devices into your systems, we enable real-time, two-way communication—giving you automated insights and management over your energy use like never before.

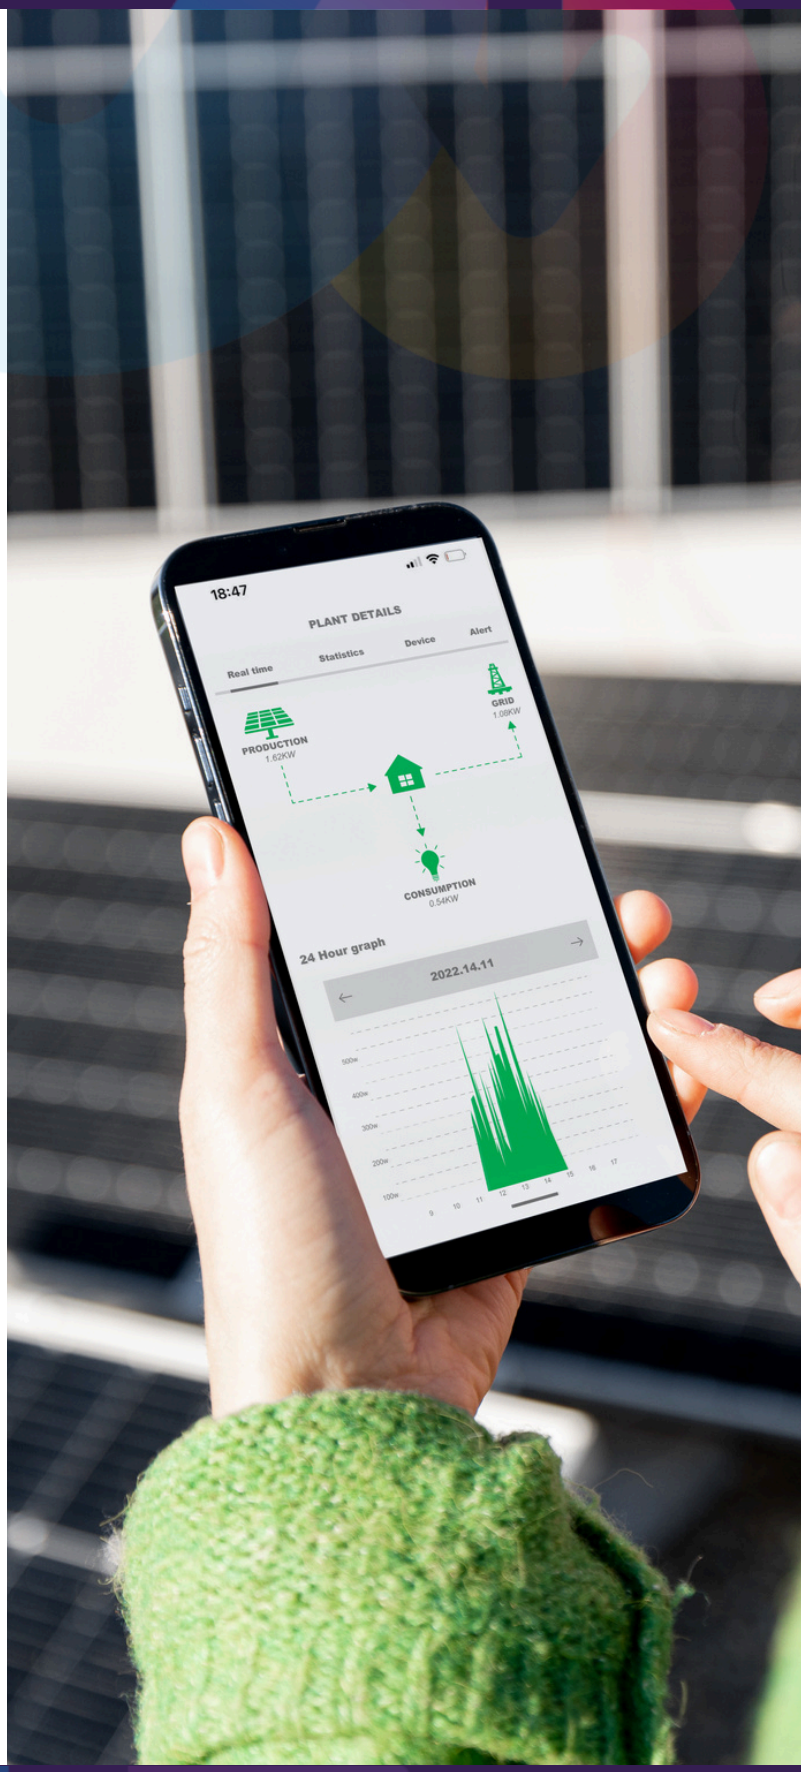

Smart Meters

Smart meters give you instant visibility into your energy consumption—allowing you to track usage patterns, spot unusual spikes, and monitor trends over time. These insights empower you to make informed decisions and develop targeted strategies to cut energy use and reduce costs.

We can coordinate the installation of a smart meter at your site, or arrange for repairs if needed—ensuring you're always equipped to stay in control of your energy.

Energy Management Systems

An Energy Management System (EMS) uses data from smart meters, sensors, and connected devices to monitor and optimise energy use in real time. It identifies inefficiencies and provides actionable insights to improve energy performance.

hello@reducemycosts.co.uk

Carbon Net-Zero Pathways

Reaching net zero isn't just a goal - it's a collective responsibility. Let's help reach:

- A 50% reduction in emissions by 2032.
- A 100% decarbonised electricity grid by 2035.
- £1.4 trillion investment by 2050.
- Net zero by 2050.

If your business isn't already taking steps to cut carbon, it's not a matter of if, but when you'll need to act.

At Reduce My Costs, we help you get ahead with services that are practical, affordable, and tailored to your needs. From solar PV and LED upgrades to real-time energy monitoring and emissions reporting, we make carbon reduction simpler.

With rising energy costs, tightening regulations, and growing pressures from investors and customers, doing nothing could cost you more - in fines, missed opportunities, and lost credibility.

Our team have both technical expertise and strategic insight. We show you where to cut waste, where to invest, and how to stay compliant - all while reducing your costs.

- Meet Mandatory Deadlines
- Enhance Efficiency
- Long Term Savings
- Access Funding

hello@reducemycosts.co.uk

Energy Consultancy Agreement

We want to provide the highest standard of service we possibly can with the idea that if we can demonstrate our capabilities and reliability to you – it allows us to work with you and continuously build on our working relationship moving forward.

We like to be able to hold ourselves accountable, and give you the security to know we are working with you towards your goals as an organisation, whether that to be reducing costs, reducing carbon emissions or increasing monitoring/reporting on the processing within the company.

An Energy Consultancy Agreement encompasses everything your business is looking to implement, alongside the services we offer here at RMC. We will sit down with you and go over what is achievable, tangible and realistic within a timeframe specified pre-agreement.

Throughout the agreement we will constantly feed back to you, and display what has changed in the period between feedback. The agreement is there to allow you to know we are here to help, and we will do everything we can to do so.

- Ongoing Support
- Compliance
- Clarity and Structure

hello@reducemycosts.co.uk

Compliance and Exemptions

Many businesses are unaware of compliance and exemption laws that could benefit their bottom line - or protect them from costly penalties. From ESOS and SECR obligations, to exemptions under schemes like MINMET for energy-intensive processes, or CCL where low usage or specific activities may qualify a business for relief, there are real opportunities to save money and stay compliant.

What is ESOS?

ESOS (Energy Savings Opportunity Scheme) is a mandatory energy assessment scheme for large UK organisations. It requires eligible businesses to measure their total energy consumption and identify cost-effective energy-saving opportunities every four years.

What is SECR?

SECR (Streamlined Energy and Carbon Reporting) is designed to improve transparency and accountability around energy use and carbon emissions. It requires eligible businesses to disclose their energy consumption and emissions in their annual reports.

What is MINMET?

The MINMET exemption applies to energy consumed in mineralogical and metallurgical processes, recognising that these industrial activities are already subject to emissions trading schemes or have limited flexibility to reduce energy use.

What is CCL?

The Climate Change Levy (CCL) is a government tax added to business energy bills to encourage more efficient energy use. But not every business has to pay it. You could be exempt depending on your gas and electricity usage, as well as other factors.

How we help:

At Reduce My Costs, we take the hassle out of compliance. We'll check if your business qualifies for any exemptions, make sure you're not overpaying, and ensure you're fully compliant. From usage reviews to paperwork, we handle it all - so you can focus on running your business while we maximise your savings.

We Can Also Help You With...

Water

We are partnered with major water suppliers in the UK, meaning we can find the most competitive water packages.

Telecoms

Telecoms doesn't have to be complicated! Switching business landlines can be fast and hassle-free.

Card Payments

Whether a business is new to card payments or looking to switch provider, the lower processing fees the better. Average savings of 35%!

Web Design

We can help your clients set up their business online, build their presence and attract the right audience.

Waste

We can manage domestic and commercial waste with an average saving of 50%!

Insurance

We can help businesses have peace of mind, knowing they are fully protected from all future uncertainties.

Finance

Let our finance experts help take control of what's important.
